Database

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

                                                                                                                                                                                following preference: calcium > manganese > magnesium > zinc.
Seems to bind to collagen type IV and laminin.
SUBCELLULAR LOCATION: Type I membrane protein (isoforms 1 and 2).
Secreted (isoform 3). Isoform 1 is expressed at the cell surface while isoform 2 is predominantly expressed within the endoplasmic reticulum and not at the plasma membrane.

Note=No experimental confirmation available;
TISSUE SPECIFICITY: Expressed in colon, heart,
liver, peripheral blood leukocytes, placenta, (
small intestine and spleen.
DOMAIN: Binding to PA seems to be effected thro
SIMILARITY: Belongs to the ATR family.
SIMILARITY: Contains 1 VMFA domain.
